

Black-series COMBO-STROBE LED light-bar, E-approved IO-3OV

Double-rowed LED light-bar with integrated R65 strobe-light and dual-color position-light. So everything you could wish for in a LED light bar.

OUTLET - ONLY 1 PCS LEFT

E-approved LED light-bar in our Black-series with a double LED line and a powerful combo-light, that is designed in a nice and slim black housing. With "hidden" LED's that gives an anonymous look and discreet look with the dark background.

The combo-light takes the best of a "spot-" and "flood" light bar. On each side, there are flood lenses and in the center, spot lenses. This way you have a good combination of the broad light spreading from the sides and the focused light in the center.

Furthermore, the LED bars have integrated R65-approved strobe-light in the upper half of the bar. If that was not enough, they also have dual-color positions light in xenon-white and yellow / orange respectively. There you will get a lightbar with everything you could ever wish for.

The LED lightbar is produced in an aluminum housing with a glossy black finish. The result is a light and slim design with optimal cooling for the LEDs. The front glass is polycarbonate, which has a very high tensile strength.

Assembly:

The light bar is very easy to install with the included pins, washers, bolts, and nuts. The legs are mounted at a suitable distance, after that the bolts are clamped into the side.

- Black: Minus / -
- Red: High-beam
- White: White position-light
- Yellow: Yellow position-light
- Green: Yellow strobe-light
