matronics.

W3W / W5W 36xSMD Position set I2V

Very bright position set bulbs with 6 SMD, provides strong and broad light. Available in xenon-white and yellow.

Very bright position set bulbs with 36 SMD, provide strong and broad light.

Bulbs with high output and built-in voltage regulator, avoiding faults on most cars with Canbus or lamp-control. The LED bulbs may, of course also be used in vehicles without Can-Bus, etc.

Buy online at: www.matronics.eu/120378

Note !!! High heat from the headlights / remote spotlights shortens the life of the LEDs.

The price is for a set of 2 bulbs.

Xenon white SKU 120378 Voltage: 12V Consumption: 0,34A / 4W Lumen: 900Im Kelvin: 5700K Equals: 15W

Yellow/Orange SKU 120379 Voltage: 12V Consumption: 0,30A / 3,6W Lumen: 300lm Equals: 15W
