

Matronics LED emitter for Double-burner lamps

Compact emitter for Doubler Burner lamps, available as Dual Color and single color. Replaces the original bulb holder. Easy to mount

Compact emitter for Doubler Burner lamps, available as Dual Color and single color. This also allows you to make combinations of colors and functions, eg. white positionlight in both sides, and also US indicator light in one side.

The emitters has a built in seperator, to make the same "double burn" look as the original has, where the newer double burner with built in LEDs do not have the same retro look.
