Series 40 - Tilt Joint

Two nylon plates lock in 5° intervals. Ideal for angling parts, easily adjusted with a handle.

Two nylon plastic plates with interlocking teeth that secure them at a fixed angle in 5-degree intervals. The plate is placed between the two parts to be angled. Buy online at: www.matronics.eu/A400453

Can be used, for example, to lock an angle between two profiles. With a handle in between, quick adjustments can be made easily.

Series 40 - **Tilt Joint** SKU A400453 Dimensions: 20 x 40 x 40mm
