

Start add-on for color change

Customize light color as desired. Pay startup fee once per order. Specify your color choice in comments.

If you want your light, e.g., strobe, to be in a different color as standard, we can usually create it in a special edition.

You just add this startup fee and specify your color preference in the comment field.

The startup fee is charged only once per order.

It doesn't matter if you order 1 set or several different ones.
