

## 2 PCs 5 mm RC Diodes in Parts 6-9 Volt

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. or techflex, mounting frames, wire and assembly instructions.

These diodes are particularly well-suited for the headlights/fog lights as the LEDs have a concentrated dispersion and a high brightness. The diodes have clear/transparent lens.

Depending on the connection you want, you can find different connectors, switches, batteries and battery holders under RC-Accessories.

## Yellow

SKU 130422

Operation Voltage: 6-9V @ 20mA

Color: Yellow

Wave Length: ~ 589nm Brightness: 1300mCD Lens type: Diffuse Light Scattering: 120 °

## Red

SKU 130412 Color: Red

Light Scattering: 120 ° Brightness: 1000mCD

Operation Voltage: 6-9V @ 20mA

Lens type: Diffuse Wave Length: ~ 625nm
