

Strain-Relief for EI4, E27 and G9 Sockets

Strain-relief that is screwed on to the end of the sockets, so that the wires in the screw-terminals have no strain.

The relief is being screwed on at the end of the holder and then it passes through it, relieves the wires into the screw terminals.

Buy online at: www.matronics.eu/606509

When the clamp is screwed into the socket, place the cord through the cord connected, then tighten the screw fitting in relief.
