matronics.

Twin wire for a low power, 2xO.35mm²

Two joined wires that can supply up to 50V. The lack of cape makes the wire very thin and flexible. It is highly usable with LED stripes.

Two joined wires that can supply up to 50 VDC. The lack of cape makes the wire very thin and flexible. It is highly usable with LED stripes, but it can also be used for speakers.

The white model has a marking on one of the wires that can be used to mark the positive wire and the black wire a thin red marker.
