

Cutting of profiles

If you want your profiles in a specific length, we can do that for you. Note in the order remarks the lengths you want in millimeters

If you want your profiles in a specific length, we can do that for you. We cut in straight cuts.

NOTE: The price is per cut, so if you have a profile that needs to be cut in 3 places, then you have 3 cuts in the basket.

We only offer custom cuts for measurements over 250mm!

When ordering please inform us which lengths you want by writing a comment in the comments section as shown on the picture above. All measurements must be given in mm / millimeters. The saw blade takes approx. 5mm material and since there can be a slight variation in the profile lengths, you should calculate an extra cut, if all the lengths need to have same measurements.

When ordering please inform us which goals / lengths you want by writing a comment in the comments field as shown in the picture.

Notice: If you chose profiles in custom lengths, the right to return is waived.
