Specifications

Voltage 24V DC

LEDs 48 dual color

The built in dual color light can be connected in various ways. The wires match the color the light base has. The light base turns on the light based on which wire is connected to plus, while the other is connected to minus. This makes it possible to connect the base this way:

- [Color changer controller / Polarity flipper](#)
- [Dual color US-light controller](#)
- One single color without color-change
- Color change using relay or switch (must be dual pole switch DPDT)
