A complete indicator consists of the following parts:

- Head
- Bulb
- Coupling
- Indicator-block

There are also these accessories for the indicator:

- Silicone rubber protection, to avoid dirt in the switch
- Shield, to prevent unintended activation

Coupling

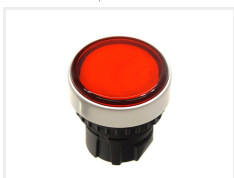

The coupling is simple pushed on to the bottom of the switch. The coupling is easy to take of again, by pushing the yellow parts, and pulling the coupling from the switch. This makes it easy to connect and replace.

Connecting the indicator

The indicator block is connected to power (plus and minus or null and phase) and the bulb is inserted in the indicator-block.
