

Matronics Dual Color BA15s

Bright Dual Color bulb, that fits in to all BA15s sockets. The 6 bright LEDs change color when flipping the polarity.

Bright Dual Color bulb, that fits in to all BA15s sockets. The 6 bright LEDs change color when flipping the polarity. Choose between 12V or 24V in different color combinations.

The bulb is easy to mount, but requires some changes to the wiring, as the color changes when you swap plus and minus. This can be done with a Dual Color polarity flipper or a Dual Color US light controller.

Note that in some lamps, the ground connection is fixed (eg. doubleburner), so the bulb cannot be used.

Controllers for Dual Color
