

Prolumo Work SuperFlat Blitz - LED work-lamp, Flood 10-30V 1160 lm

Super flat LED lamp with integrated R65-approved warning light. It can be used, for example as a work lamp or as an extra reverse light.

A super flat LED lamp with R65-approved warning / strobe light, can be used for work-light or extra reversing light. With its very flat design, it can be placed in many places, where there is not a lot of space and where you almost will not be able to see it. Nevertheless, it has a very high light output with its 1160 raw lumen.

The lamp is divided almost half-half between work light and warning / strobe light. The warning / strobe light is R65-approved, and it can be used on public roads. It is also R10 (EMC) and R148-approved, which means it is approved specifically as a reversing light. The wires should be connected as follows:

- Red: + / Plus
- Black: - / Minus
- Yellow: + / Warning / strobe light

Produced in black-colored aluminum with a plastic front.

Light color: 6500K

Wire length: 50cm

Very simple mounting with the included bracket, tape, bolts, and screws.
