

Matronics emitter for VAG interior light, 12V

Easily upgrade your VAG car's lighting with a stronger light source without changing its original look. Available in multiple colors

Our light source makes it easy and affordable to upgrade the lighting in your VAG car. Instead of buying a completely new lamp, you can simply disassemble the old one and replace the light source inside, without altering the car's original appearance.

The new light source has 6 LEDs, that provides a much stronger illumination, and you have the option to choose a different light color than the original white.
