

Strands Siberia Bush Ranger

Strands Siberia Bush Ranger LED lights in 7" and 9" with yellow lens, 9600 and 20400 lumen respectively, and dual color position light.

Strands Siberia Bush Ranger LED driving lights, available in 7" and 9", provide highly effective lighting with an elegant and rounded design. They are part of the highly popular Strands Siberia series, developed with a focus on powerful lighting combined with stylish design.

The yellow front lens delivers a comfortable warm / yellowish (3500K) light, which is highly suitable in snowy weather, as the light does not reflect in the snow in the same way as a xenon-white (6000K) light would.

The elegant appearance is enhanced by dual-color positional lights running along the lens edge, adjustable to orange or warm white.

The 7" version of the Bush Ranger delivers 9600 lumens and, with a wide combination beam, achieves a range of 346 meters at 1 lux.

The 9" version delivers 20400 lumens with a range of 387 meters at 1 lux. This allows you to see reflections in road markers much farther than specified.

The combination light offers a strong, focused beam in the center and ample surrounding light, providing wide road illumination from edge to edge.

Designed for cars and other light vehicles, the Bush Ranger is also suitable for larger vehicles seeking compact, discreet lighting. Its black housing is robust, durable, and completely waterproof (IP67).

The pre-mounted DT4 connector makes installation easy, ensuring quick and stable connection. Compatible with both 12V and 24V systems and protected against radio interference (ECE R10).

Although not E-approved for public road use, the Bush Ranger is the ideal choice for those seeking maximum brightness and a sharp, stylish look without compromise.

Connection:

- Black: Minus / -
- Red: + High beam
- White: + White position-light
- Yellow: + Yellow position-light
