

## Dimmable transformers - 230VAC - 12VDC

Dimmable transformers, that can be connected with screw terminals to 230VAC on the input and to 12VDC on the output.

The dimmable transformer has 12Vdc output and therefore it is particularly suitable for dimming of LED SMD stripe and some 12V LED light sources. Please contact our [support](#) if you have a light source you would like to dim, so we can check if it works as intended.

**matronics**

Buy online at [www.matronics.eu/503250](http://www.matronics.eu/503250)

The transformer must NOT be combined with a 12Vdc dimmer - if you are in doubt then please contact [support](#), we respond to any questions regarding transformers.

Since this is a 1st generation dimmable transformers, there are certain things you should be aware of:

- It can be dimmed by most dimmers, as long as you adhere to dampen's minimum requirements, otherwise you might experience flickering light. Therefore we strongly recommend you to use [Niko LED dimmer](#), as it allows you to dim the light far down without any flickering.

## Product overview

### 2.500mA - 30W

SKU 503250  
Dimensions: 20 x 160 x 48mm

### 4.160mA - 50W

SKU 503255  
Dimensions: 23 x 180 x 60mm

### 7.000mA - 84W

SKU 503350  
Dimensions: 40 x 260 x 70mm
