

## 80W Cree LED 10-30V - BA15S Canbus

Very bright BA15s LED bulbs with 16 pcs. 5W CREE LEDs - equivalent to a 40W incandescent bulb.

Very bright BA15s LED bulbs with 16 pcs. 5W CREE LEDs (80).

The powerful CREE LEDs are placed, so that 4 LEDs light forward through the special lens, while the 12 others are placed, so that they light to the sides and to the back, so that the light is spread to all surfaces of the lamp-reflector.

The light output is equivalent to a 40W incandescent bulb, while the actual power consumption is 8-10W. The xenon white color is approx. 6000K.

The LEDs have a high consumption, which means that you can avoid bulb control errors on most new cars. Although, certain models are too sensitive, so you must add external resistors.

You can of course use these in any car without bulb control / canbus.

Ref. Nr : 1156, 382, 12498, R10W, P21W, 12V, 24V
