Poppy LED Lamp, 12 - 24V

A flat LED lamp for lighting up your Poppy air fresheners. 5 powerful LEDs make the poppy-lamp glow with a nice even light. Red, white, green, blue, orange and RGB. With cigar-plug or USB.

A flat LED lamp with a USB or cigar-plug (do not cut) for lighting up your Poppy air fresheners. 5 powerful LEDs make the poppy-lamp glow with a nice even light. The lamp is available in red white, green, blue and orange. A colored model will simply make all Poppy models light in the same color or mix with the color, while the white lamp will just make a yellow bottle glow yellow etc.

RGB model

With the RGB model you can change between the light color and effects, such as color-changing and flashing, all selected with the controller that is mounted on the wire.

Mounting and connecting

The lamp can be connected to both 12V and 24V.

There is double-adhesive tape on the top and bottom of the lamps, so you simply put the lamp on a table or similar, and then just put the bottle on top.

The lamp has 90cm cable and a cigar plug on the end - DO NOT REMOVE THE USB/CIGAR-PLUG!!! There is a voltage control in the cigar plug that cannot be omitted. Other than that we also have with USB supply for direct plug-in.

Extra tape

The extra tape can be used if you move the base, or replace the Poppy, and the tape will not hold any more.
