

Universal intermediate relay- 480W (SPST - NO)

A simple relay with one pole/switch that is closed when the relay is powered. It can be used for turning on lights etc.

A simple relay with one pole/switch that is closed when the relay is powered. It can be used for turning on lights etc.

The technical name for such a relay is SPST - NO (Single pole, single throw, normally open). The 12V models are with or without a bracket.

Socket

A plastic socket / base / connector for 4 and 5 pin relays. There is a 20cm wire on the base, making it easy to connect.
