

## Push Dimm transformer - 230VAC - 12VDC

A power supply with an integrated dimmer, so it can be controlled with maintained units.

The power supply has standard 230V input and 12V DC output. With the built in dimmer you avoid having to connect a separate dimmer unit. It can dim from 0% to 100%.

It can be controlled with push-button and 150W also can handle 0-10V signal, 10V PWM and resistor / potentiometer.

Push-button / potentiometer is not included.
