

Regulator for DC motor, PWM - 10-30V, 3A

Compact speed regulator / motor controller for DC motors. Can be used for separate DC motors, gear motors, actuators etc.

Compact speed regulator / motor controller for DC motors, with dial for speed and a 3 position toggle switch for choosing direction or stopping it. The speed can be regulated down to 5% depending on motor.

The controller can be used for separate DC motors, gear motors, actuators etc. As it uses PWM for regulation, it will have a higher torque than if the voltage was lowered to an equivalent speed.

There are screw terminals for connecting to power and to the motor. You can disconnect both the switch and dial, making it possible to panel mount the controller.

Specifications

Max power	100W
Voltage	10-30V
Current (rated)	3A
Current (max spike)	4A

Regulator for DC motor, PWM - 10-30V, 3A

SKU 609817

Mountinghole: 3,5mm

Dimensions: 27 x 74 x 47mm
